- Deerfly Wrap up discussion - The race was good. Weather was fair and a bit cold which likely deterred some racers from signing up. Registration was steady from 2017 to 2018.
- Registration processing through the volumeone system was seamless. Super easy and learned from this experience how to make it even easier for next year. Processing and assigning race numbers, collecting T-shirt sizing will be an improvement that can easily be supported in the tool. I just wasn't smart enough to know the capabilities this year. All costs are added and paid by registrants.
